Best Practices for Biomedical Research Data Management

Module 2: Research Lifecycle Research Data Files

Amanda Kowalsick, BS, PhD, Tufts University

This video will give an overview of some data file and folder naming challenges encountered in managing data in a research lab from the perspective of a Chemistry department Postdoctoral Researcher. It will stress the importance of creating metadata describing your research early in on in the lifecycle.

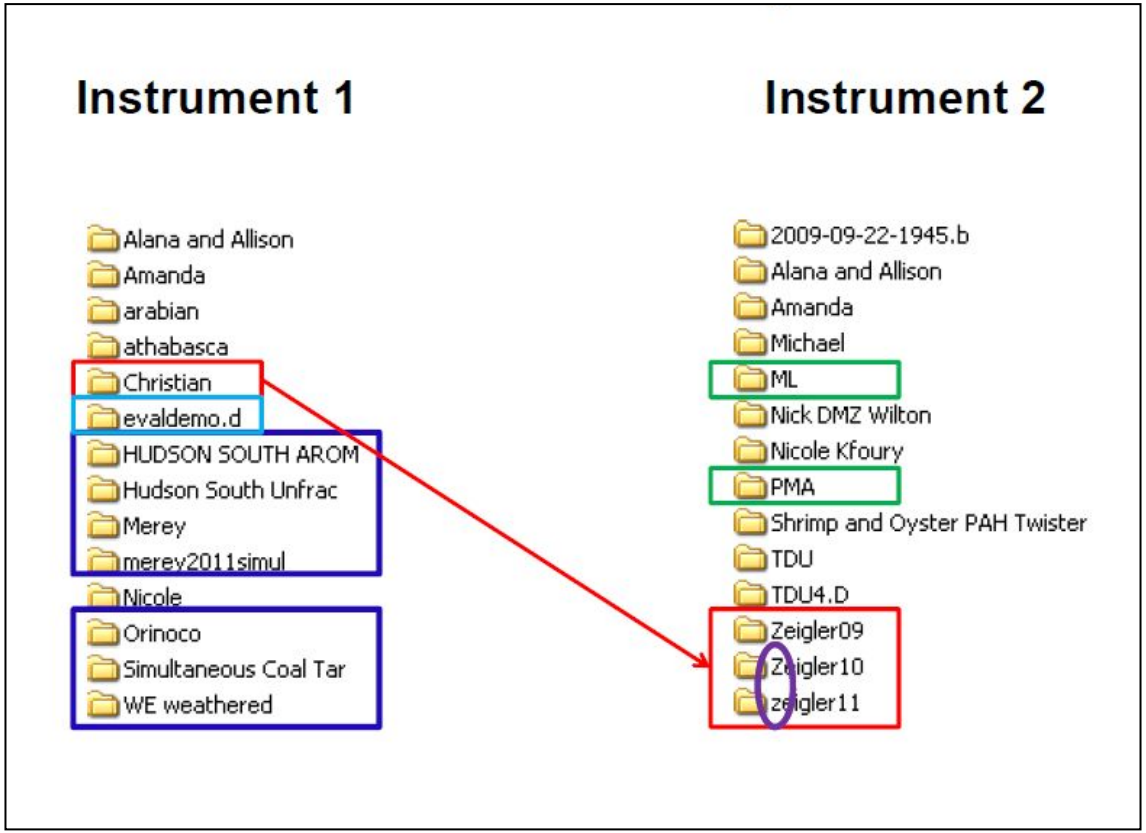
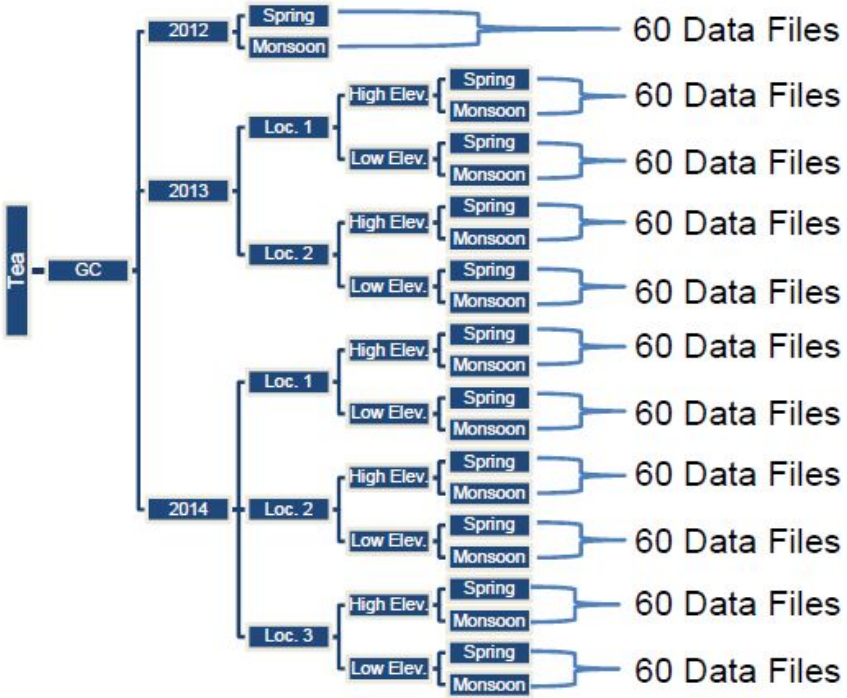
File Naming and Management Issues



Data Management: The Reality



660 Raw Data Files…

Not including:
Spreadsheets,
Charts, Pictures,
Method Files, etc.

How do we store and retrieve all this data, safely and easily?
