Big Data to Knowledge(BD2K)

Best Practices for Biomedical Research Data Management

Module 5: Data Management Policy
Funder Policies

Rebecca Reznik-Zellen, MLIS, UMass Medical School

This video will describe in more detail funder policy objectives and characteristics. It will review the evolution of funder policies and breakdown prominent funding agencies' requirements for data sharing and publishing, including The National Institutes of Health.

CC BY NC SA

Funder Policies

Objectives:

- Improve the efficiency of and accelerate research
- Support the re-use of data for new insights and discoveries
- Foster collaboration
- Facilitate greater transparency

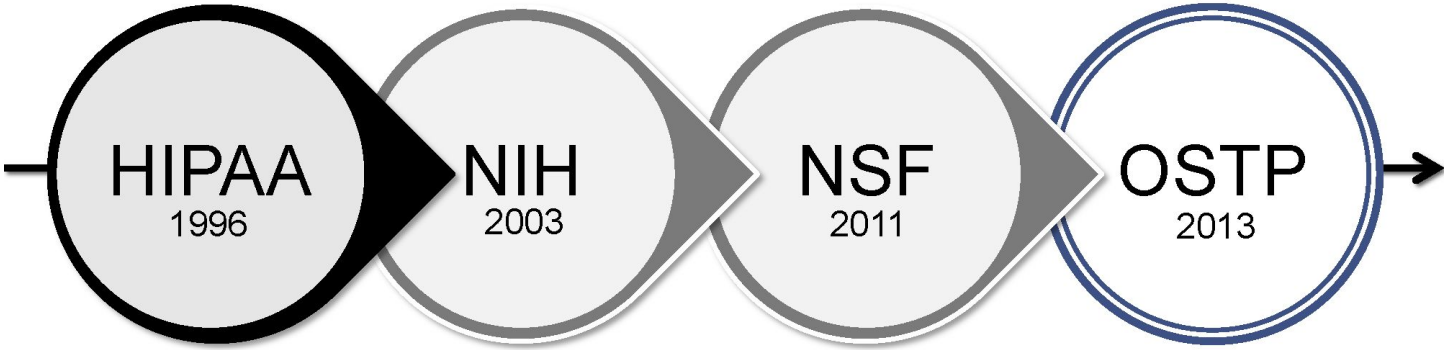
Shearer K. 2015. Comprehensive Brief on Research Data Management Policies. Government of Canada. Available from: http://www.science.gc.ca/default.asp?lang=En&n=1E116DB8-1.

Characteristics:

- Parameters are typically general in scope
- Policies often don't address standards thoroughly
- Policies concentrate on access more than preservation
- Publications are infrequently mentioned in data policies

Dietirch, D., Adamus, T., Miner, A., Steinhart, G. 2012. De-Mystifying the Data Management Requirements of Research Funders. Issues in Science and Technology Librarianship, Summer 2012. doi: 10.5062/F44M92G2.

US Funder Policies



Data Sharing Plan
Any project over $500 K

Data Management Plan
Any PI submitting a research proposal

Public Access Plan
Any agency budgeting over $100 M

Goben A. and Salo D. 2013. Federal research data requirements set to change. C&RL News Sept. 2013 421-425. Available from: http://crln.acrl.org/content/74/8/421.full

NIH

- **Data Sharing Policy (2003)**
- Applies to any projects funded by NIH over 500K since 2003
- Requires a brief narrative paragraph following the Research Plan
- Is not included in the review of an application's scientific merit or priority score

NIIH Data Sharing Policy and Implementation Guidance. Available from:
http://grants.nih.gov/grants/policy/data_sharing/data_sharing_guidance.htm#ex

Digital Data Sharing (2015)

- "NIH intends to make public access to digital scientific data the standard for all NIH-funded research." – "expanding its data sharing policy beyond current requirement…."

Plan for Increasing Access to Scientific Publications and Digital Scientific Data from NIH Funded Research. Available from:
http://grants.nih.gov/grants/NIH-Public-Access-Plan.pdf

Margaret E. Henderson and Rebecca Reznik-Zellen. "A Review of Responses to the OSTP Memo, or, A Journey Through the Land of Acronyms" (2015) Available at: http://works.bepress.com/rebecca_reznik-zellen/29/

	Publications	Data
Scope	Peer-reviewed research publications	Unclassified digital scientific research data
Requirement	Deposit of final peer-reviewed manuscript into PMC	Submission of DMP; deposit of data into appropriate, existing, publicly accessible repositories, including NIH data repositories
Time frame	Upon acceptance, with maximum 12-month embargo*	Upon acceptance for publication (will explore)
Costs	Include appropriate costs in proposals	Include appropriate costs in proposals
Reporting	Reporting through eRA Commons and My NCBI	Utilize existing reporting structures
Compliance	Witholding of funds	“enforcement actions” including withholding of funds

HHS

Provides continuity across Operating Divisions:
NIH, **CDC**, **FDA**, **AHRQ**, and **ASPR** (voluntary)

- PubMed Central will serve as the repository for publications funded by HHS Operating Divisions
- HHS will enable stakeholders to petition to change the 12-month maximum embargo period for publications
- HHS will take a common, stepped approach to establishing data policy and infrastructure: assessment, inventory, dmps, pilots, training

Guiding Principles and Common Approach for Enhancing Public Access to the Results of Research Funded by HHS Operating Divisions (February 2015) Available from: http://www.hhs.gov/open/public-access-guiding-principles/index.html

	Publications	Data
Scope	Peer-reviewed research publications	Unclassified digital scientific research data
Requirement	Deposit of final peer-reviewed manuscript into PMC (NIHMS & CDC Stacks for CDC)	Submission of DMP; deposit of data (into discipline or agency repository)
Time frame	Maximum 12-month embargo*	Upon acceptance or w/in 30 of collection
Costs	--	Include appropriate costs in proposals
Reporting	Existing reporting structures	Existing reporting structures
Compliance	Witholding of funds	Reduction or restriction of funds, award termination, negative influence on future awards
