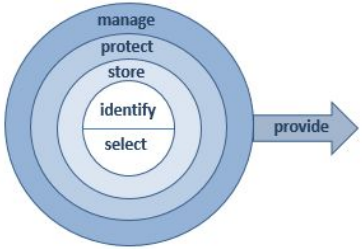
Best Practices for Biomedical Research Data Management

Module 8: Curation & Preservation for Data Community Context

Nancy McGovern, PhD, MIT



This video will give an overview of the development of curation and preservation for research data. Curation and preservation are ongoing throughout the research lifecycle, and are not new issues to manage. This overview provides context to why and how digital content should be curated and preserved.

Community Growth

Curation and Preservation are ongoing
not new issues to manage

- **1960s**: national archives, data archives
- **1970s**: increasing interest and concern
- **1980s**: digitization developments
- **1990s**: library, museum, Web collections
- **2000s**: digital art, geospatial, e-science…
- **2010s**: research data, analog archives…

variations by nation, domain, size, complexity…
